
MERIAM AZIZ

Artificial Intelligence Engineer

Ismailia, Egypt • +20 1208140650 • meriamaziz000@gmail.com • LinkedIn • GitHub

PROFESSIONAL SUMMARY

Artificial Intelligence Engineer with hands-on experience in **Machine Learning, Deep Learning, Computer Vision, Large Language Models (LLMs), and AI Agents**. Skilled in developing end-to-end AI solutions using **Python, TensorFlow, PyTorch, OpenCV, YOLO, LangChain, and Streamlit**. Experienced in building intelligent applications including sign language recognition, multi-agent systems, malicious URL detection, audio deepfake detection, and OCR-based license plate recognition.

EDUCATION

Bachelor's Degree in Information Technology and Computer Science (Artificial Intelligence Major)

The Egyptian E-Learning University (EELU), Suez Canal Branch

June 2025

GPA: 3.25 / 4.00

Relevant Coursework:

Computer Vision • Natural Language Processing • Advanced Machine Learning • Reinforcement Learning • Image Processing.

TECHNICAL SKILLS

- Programming: Python, C++
- AI & Machine Learning: TensorFlow, PyTorch, Scikit-learn
- Computer Vision: OpenCV, YOLO, EasyOCR, Image Processing
- LLMs & AI Agents: LangChain, RAG, AI Agents, Prompt Engineering
- Frameworks & Tools: Flask, Streamlit, Git, GitHub
- Libraries: Pandas, NumPy, Matplotlib

EXPERIENCE

AI Agent Developer Trainee

Orange Digital Center (AI Agent Developer Program)

Apr 2026 – May 2026

- Completed the AI Agent Developer Level 1 training program (30 hours) with a final grade of 100%.
- Independently designed and developed AIOS, an AI-powered multi-agent emergency response system.
- Led the project from concept and design through implementation and deployment.
- Built and orchestrated six specialized AI agents using Google Gemini, LangChain, and prompt engineering techniques.
- Integrated Retrieval-Augmented Generation (RAG), interactive mapping, speech synthesis, and automated PDF report generation into a unified AI workflow.
- Developed the end-to-end application using Python, Streamlit, Folium, gTTS, and ReportLab, integrating all system components into a unified workflow.

Machine Learning Engineer Trainee

Digital Egypt Pioneers Initiative (DEPI)

Oct 2024 – May 2025

- Built machine learning models for classification tasks using Python and Scikit-learn.
- Performed data preprocessing, feature engineering, model training, and evaluation.
- Applied Microsoft AI technologies throughout model development and deployment workflows.

Artificial Intelligence Trainee

National Telecommunication Institute (NTI)

Jul 2023

- Completed intensive training in Machine Learning, Deep Learning, Computer Vision, and Natural Language Processing.
- Developed AI models and applications using Python and Scikit-learn.
- Applied AI concepts through hands-on projects and practical assignments.

PROJECTS

AIOS – Multi-Agent Emergency Response System

GitHub

Python • Streamlit • LangChain • Google Gemini • Folium • gTTS • ReportLab

- Developed an AI-powered multi-agent emergency response system with six specialized AI agents.
- Integrated Google Gemini, LangChain, RAG, interactive mapping, speech synthesis, and automated PDF reporting.
- Built an interactive Streamlit application for real-time emergency response support.

DeafBot – AI-Powered Sign Language Recognition System

GitHub

Python | YOLOv8 | OpenCV | Google Gemini | Text-to-Speech

- Developed an Arabic Sign Language recognition system using YOLOv8 and Gemini.
- Integrated Text-to-Speech for intelligent communication.

Audio Deepfake Detection

GitHub

Python | PyTorch | Deep Learning

- Built a deep learning model for AI-generated audio detection using the SceneFake dataset.

CERTIFICATIONS

- AI Agent Developer Level 1 – Orange Digital Center (2026)
- Advanced AI in Computer Vision – Orange Digital Center (2025)
- Machine Learning Engineer – DEPI (2025)
- Microsoft SC-900 – Microsoft (2025)
- IEEE AI Bootcamp (2024)
- Artificial Intelligence Training – NTI (2023)

LANGUAGES

- Arabic — Native
- English — Professional Working Proficiency
